CLEAR RATES DATA PLATFORM

Hospital rates database.

Thousands of hospital disclosures organized and cleaned in one machine learning-powered database.

Drug rates database.

List, cash, and negotiated rate for hospital-administered drugs organized by HCPCS and NDC.

Device rates database.

List, cash, and negotiated rate for devices organized by HCPCS and FDA-device code.

COMING SUMMER 2022

Payer rates data.

Want unprecedented access to payer data? Talk to us about our early adopter program.

Professional rates database.

Millions of rates from both payer and provider disclosures coming July 2022.

TOOLS & FEATURES

Rate Sense.

Filter data by market, service code, or payer/plan and find insights like never before.

Simple Extracts.

Export data tailored to your specific needs or reconciled disclosures by metric.

Rates API.

Integrate pricing data into any build, surfacing the desired rates precisely as needed.

Turquoise Health data is a structured, standardized schema that can be brought into any business intelligence tool of choice or integrated with an existing SQL database. And don't worry, there is no PHI in our rates data.

**Sure, you could collect the data yourself.
Or, you could work with us.**
