# Capital Rx

JUDI™

Meet JUDI™, the industry's first Enterprise Pharmacy Platform.

JUDI unifies all pharmacy benefit processes within one ecosystem, creating a level of efficiency never thought possible in healthcare management.

INNOVATIVE FRAMEWORK FOR SECURE DATA FLOW • **50x EFFICIENCY OVER EXISTING PBM SYSTEMS** • **CLOUD-NATIVE PLATFORM ADAPTS TO NEW INTEGRATIONS**
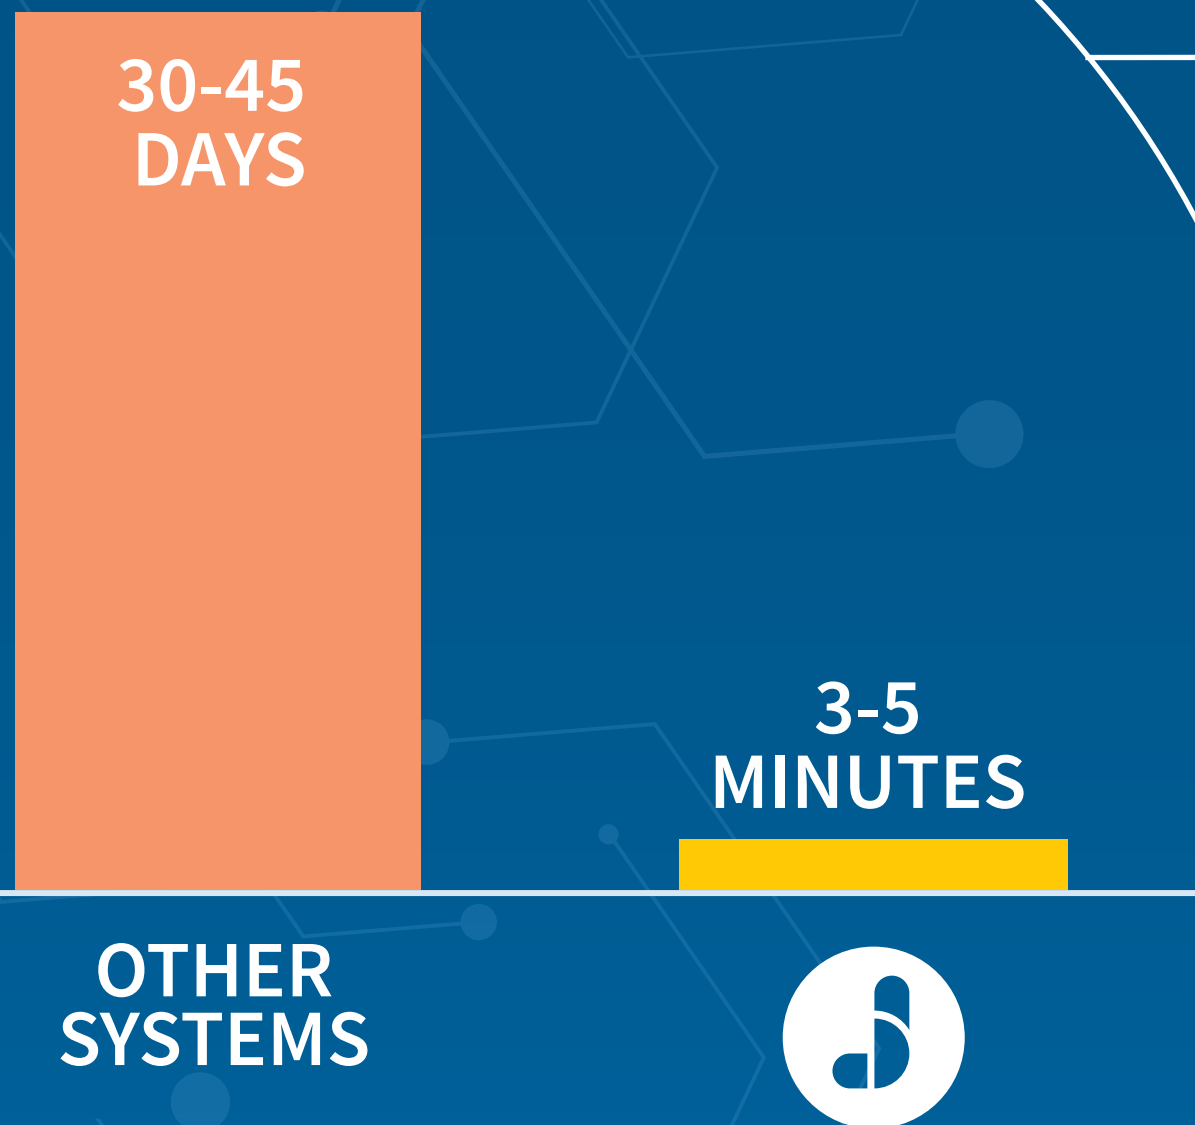

PLAN DESIGN CHANGE

A simple plan design change takes far too long on legacy systems. JUDI is built in human language around a point-and-click interface, empowering users of all experience levels to make updates in minutes.

30-45 DAYS

3-5 MINUTES

OTHER SYSTEMS

ASO PLAN SETUP

JUDI creates a streamlined process to ensure even the most complex plans are flawlessly implemented in a fraction of the time compared to existing PBM systems.

400+ HOURS

OTHER SYSTEMS

12 HOURS
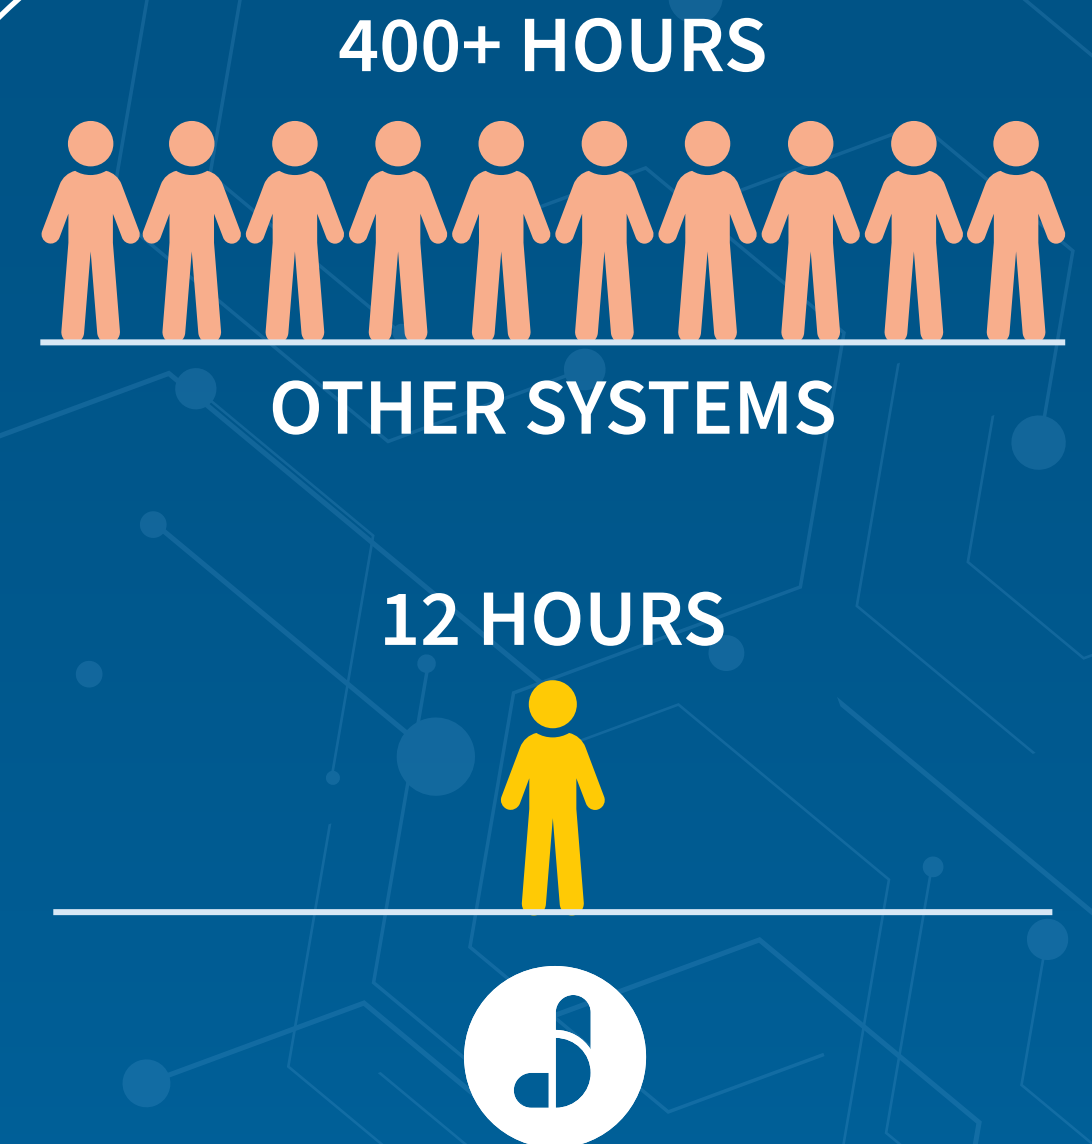

JUDI™ was developed to link all PBM operations on a single platform, simplifying the plan management experience for all stakeholders.

BENEFIT DESIGN SETUP
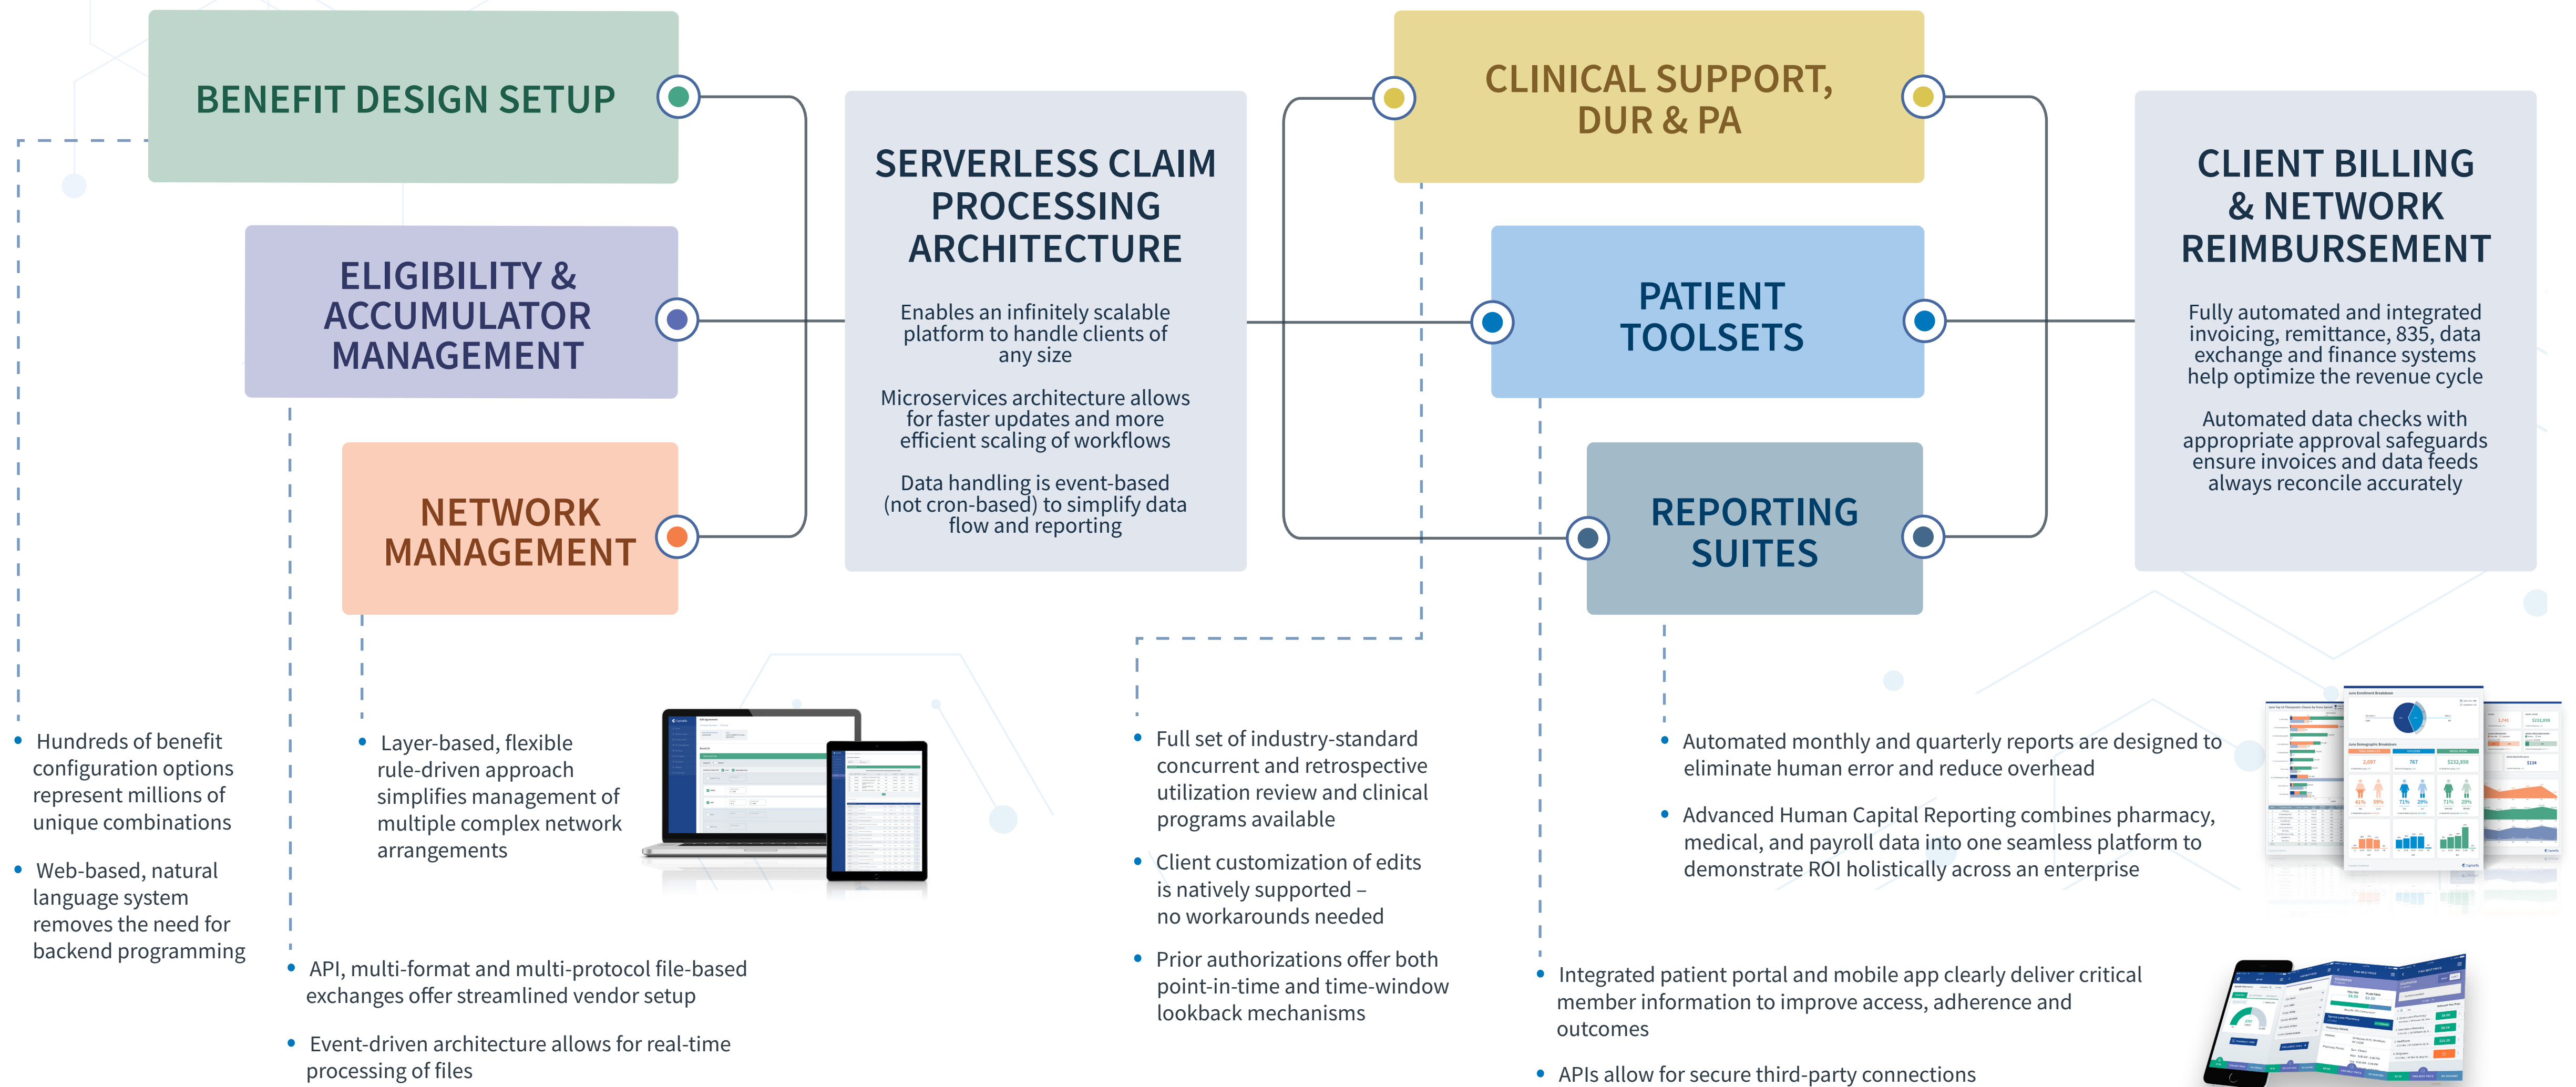

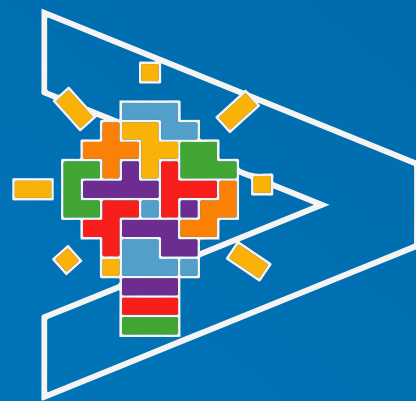

ELIGIBILITY & ACCUMULATOR MANAGEMENT

NETWORK MANAGEMENT

SERVERLESS CLAIM PROCESSING ARCHITECTURE

Enables an infinitely scalable platform to handle clients of any size

Microservices architecture allows for faster updates and more efficient scaling of workflows

Data handling is event-based (not cron-based) to simplify data flow and reporting

CLINICAL SUPPORT, DUR & PA

PATIENT TOOLSETS

REPORTING SUITES

CLIENT BILLING & NETWORK REIMBURSEMENT

Fully automated and integrated invoicing, remittance, 835, data exchange and finance systems help optimize the revenue cycle

Automated data checks with appropriate approval safeguards ensure invoices and data feeds always reconcile accurately

- Hundreds of benefit configuration options represent millions of unique combinations
- Web-based, natural language system removes the need for backend programming

- Layer-based, flexible rule-driven approach simplifies management of multiple complex network arrangements
- API, multi-format and multi-protocol file-based exchanges offer streamlined vendor setup
- Event-driven architecture allows for real-time processing of files

- Full set of industry-standard concurrent and retrospective utilization review and clinical programs available
- Client customization of edits is natively supported – no workarounds needed
- Prior authorizations offer both point-in-time and time-window lookback mechanisms

- Automated monthly and quarterly reports are designed to eliminate human error and reduce overhead
- Advanced Human Capital Reporting combines pharmacy, medical, and payroll data into one seamless platform to demonstrate ROI holistically across an enterprise
- Integrated patient portal and mobile app clearly deliver critical member information to improve access, adherence and outcomes
- APIs allow for secure third-party connections

The news is spreading about our capabilities.
